SYSTARK

2.0

Nel 2016 da due aziende leader nel settore della costruzione, commercializzazione di elementi normalizzati per stampi e soluzioni innovative per la lamiera, nasce **Systark**, che fa di esperienza e innovazione i punti fermi della sua missione aziendale atta alla distribuzione capillare di normalizzati per stampi e soluzioni meccaniche per gli stampisti e stampatori lamiera.

Appoggiandosi alle aziende fondatrici, **Systark** può contare su brand riconosciuti a livello internazionale, lavorazioni meccaniche, automazioni, asservimenti per presse, elementi costruiti dal gruppo e di un magazzino importante pronto ad assecondare le esigenze del settore.

Systark promuove un back office e supporto tecnico altamente professionale composto da commerciali, progettisti e meccanici con esperienza pluri-decennale nel settore deformazione lamiera a disposizione dei clienti. Grazie agli investimenti tecnologici, alla costante ricerca e miglioramento di cicli innovativi logistici, **Systark** mira ad offrire ai suoi collaboratori soluzioni personalizzate, accompagnate da un servizio quanto mai veloce ed affidabile.

Systark was born in 2016 from two leading companies specialized in standard die component engineering and marketing and innovative solutions for metal sheets. Experience and innovation are its core issues aimed at a detailed distribution of standard dies and mechanical solutions for mould makers and sheet metal printers.

Supported by its founding companies, **Systark** can rely on internationally acknowledged brands, mechanical productions, automations, presses servo-systems, products manufactured by its founding companies and a well-stocked warehouse ready to comply with sector requests.

Systark boasts a back office and a highly professional technical support, composed by sales managers, designers and technicians with a long-term experience in the metal sheet deformation field. Thanks to technological investments, continuous research and improvements of its innovative logistical cycles, Systark aims at offering her partners personalized solutions associated with a fast and reliable service.

systark

TRANCIATURA SHEARING / SCHNEIDEN

I sistemi di **Traciatura** scelti da Systark assicurano all'utilizzatore qualita' e performance nella traciatura della lamiera, continui test aziendali confermano i nostri standard. La scelta dei materiali D2 (WS), A2 (HWS), M2 (HSS) e sinterizzati, abbinati alle moderne tecniche di tempra, rinvenimento e rivestimento, consolidano e certificano la **qualità** del prodotto distribuito.

Systark completa la gamma di punzoni e matrici promuovendo la costruzione di normative Din, ISO e qualsiasi elemento speciale con indicazioni a disegno.

The **shearing** systems selected by Systark guarantee its customers quality and performance in the metal sheet shearing, constant tests confirm our standards. The selection of D2 (WS), A2 (HWS), M2 (HSS) and sintered materials, combined with modern quenching, tempering and coating techniques, strengthens and certifies the **quality** its products.

Systark completes punch and matrix range offering construction in accordance with Din and ISO certifications, but it is also able to satisfy any special request based on drawing supplied by customers.

Das von Systark gewählte **Stanzsystem** garantiert unseren Kunden höchste Qualität und Leistung. Ständige Überprüfungen der Fertigung bestätigen die Qualität unserer Produkte. Die Verwendung der Werkstoffe D2 (WS), A2 (HWS), M2 (HSS) kombiniert mit **hochwertiger** Vergütung und Beschichtung, stärkt die Produktivität unserer Produkte.

Systark komplettiert den DIN und ISO Bereich für Lochstempel und Schneidbuchsen mit den vom Kunden gewünschten Werkstoffen und der Fertigung nach Datensätzen oder Zeichnungen.

T7.8061.0025	25	
T7.8061.0032	32	
T7.8061.0040	40	

ATTENZIONE

Per sagomare la testina:

- rimuoverla dallo stripper
- inserirla nel dispositivo
- avvitare la ghiera di bloccaggio
- posizionare il dispositivo su macchina utensile, elettroerosione o stampo per eseguire la sagoma richiesta
- rimontare la testina

ACHTUNG

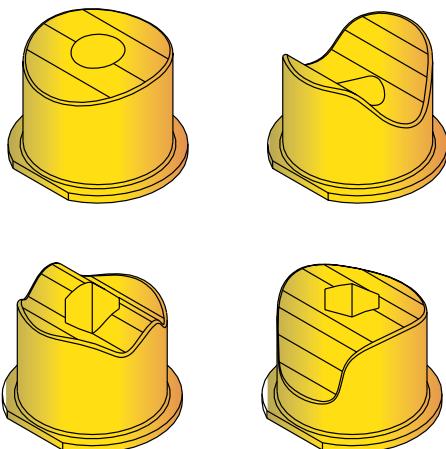

Zum Profilieren bitte wie folgt vorgehen:

- den Kopf vom Stripper entfernen
- den Kopf in die Vorrichtung einsetzen
- den Verriegelungsring festschrauben
- die Vorrichtung in die Werkzeugmaschine einbauen, Elektroerosion oder Werkzeug zum Profilieren
- den Kopf einbauen

ATTENTION

In order to shape the head:

- remove it from the stripper
- insert the head into the special device
- tighten the locking ring nut
- place the device on the machine stain, EDM or tool plate to perform the required shape
- put back together the head with the body
